

BD Influx Cell Sorter Training Workshop

You are cordially invited to the BD Influx Cell Sorter Training Workshop. BD Influx is a newly installed Jet-in-Air cell sorter in the Faculty Core Facility. It provides an open, configurable cell sorting platform that can be fully optimized for a broad range of unique applications that require specific and highly stringent sorting parameters. Influx is equipped with 4 lasers (Violet, Blue, Yellow-Green, and Red) that allow multiple emission spectrum detection simultaneously and could support high speed sorting that ensures high purity of the sorted populations with better cell viability.

Participants who attend to the Workshop Session will have exposures on the basic principle of Jet-in-Air platform based cell sorting, basic experimental setup and configuration demonstration on Influx as well as some insights on cell sorting optimization and troubleshooting.

Seminar Session (All Are Welcome):

Date & Time: 8 March 2017 (10–11:30am)

Venue: Seminar Room 3, Laboratory Block

Speaker: Ms. Grace Lin (BD Specialist, Taiwan)

Workshop Session (Registration is required):

Date : 8-10 March 2017 (4 training sessions)

Venue: Room L6-03, Laboratory Block

Trainers: Ms. Grace Lin & Ms. Ivy Chen (BD Specialists)

Pre-requisites for Workshop Session:

1. Participant **MUST** be at least a Regular User of FACS Aria I and/or FACS Aria SORP.
2. **MUST** have experience on cell sorting and understand the principle of Flow Cytometry.
3. Participation of the Seminar Session on 8 March 2017 is compulsory.

To register, please visit: https://hkuems1.hku.hk/hkuems/ec_hdetail.aspx?ueid=48310
