MEDVPN2 Installation Procedures for Mac OS X

Create a "MEDVPN2" icon for connection (to be done once only)

1. Click the Apple icon, and then Click System Preferences

2. Click the Network icon
3. Click + icon in the bottom corner of the left-hand to add a new connection

4. In the next window, enter the following:

   - From the **Interface** drop-down menu, select **VPN**
   - From the **VPN Type** drop-down menu, select **L2TP over IPSec**
   - For **Service Name**, enter **MEDVPN2**
5. From the **Configuration** drop-down menu, which currently says **Default**, and select **Add Configuration**.

6. Enter **MEDVPN2** in **Name** box, and then click **Create**.
7. Enter **medvpn2.hku.hk** in **Server Address** box, then enter your **HKU Portal UID** in **Account name** box.

8. Click **Authentication Settings...** button.
9. In the next window, enter the following:

- Under **User Authentication**, Select **Password** and enter your **HKU Portal PIN** in the **Password** box
- Under **Machine Authentication**, select **Shared Secret** and enter **hkuvpn** in the **Shared Secret** box
- Click **OK**

10. Click **Advanced...** button

11. Check **Send all traffic over VPN connection** and then click **OK** button
12. Click **Apply** button to complete the setup.
