MEDVPN2 Installation Procedures for Windows 8
Create a "MEDVPN2" icon for connection (to be done once only)

1. Click Windows Start button, and then Control Panel.

2. Click Network and Internet.

3. Click Network and Sharing Center
4. Click **Set up a new connection or network**

![Network and Sharing Center](image1)

- Click **Set up a new connection or network**
- Additionally, you can set up a broadband, dial-up, or VPN connection, or set up a router or access point.
- Troubleshoot network problems, diagnose and repair, or get troubleshooting information.

5. Select **Connect to a workplace** and then click **Next**

![Set Up a Connection or Network](image2)

- Selecting **Connect to a workplace** enables you to set up a dial-up or VPN connection to your workplace.

6. Click **Use my Internet connection (VPN)**

![Connect to a Workplace](image3)

- This option allows you to connect using a virtual private network (VPN) connection through the internet.
7. In the next window, enter the following:
   - Enter `medvpn2.hku.hk` in Internet address box
   - Enter `MEDVPN2` in Destination name box
   - Click Create

8. Back to Network and Sharing Center: **Set up a new connection or network**
9. Right click **MEDVPN2** and then click **Properties**

10. Select **Security** Tab. Choose **Layer 2 Tunneling Protocol with IPsec (L2TP/IPSec)** under Type of VPN. Then click **Advanced settings** button.
11. In the next window, enter the following:
   - Select **Use preshared key for authentication**
   - Enter *hkuvpn* in Key box
   - Click **OK**

12. Click on the **Network icon** located at the right bottom of your Desktop.
13. Click MEDVPN2

14. Key in your HKU Portal ID and password, next click OK.
15. To Disconnect MEDVPN2, right click the MEDVPN2 icon, select **Status**

16. Click **Disconnect**
