INVESTIGATOR'S SHORT CV

All investigators working within a clinical study must submit an up to date short curriculum vitae at the time of a HKU/HA HKW IRB submission.

According to the Helsinki Declaration "Biomedical research involving human subjects should be conducted only by scientifically qualified persons and under the supervision of a clinically competent medical person. The responsibility for the human subject must always rest with a medically qualified person and must never rest on the subject of the research, even though the subject has given his or her consent."

Details of the particular format should include information such as present position, education, experience, professional qualifications, courses attended, conferences attended, teaching experience, clinical trials involvement and academic output.

A template for the Investigators Short CV is given on the following page.
