**Thermo**  
SCIENTIFIC

Part of Thermo Fisher Scientific

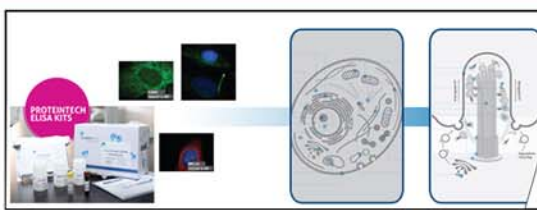

1. DNA Extraction: Plasmid / Blood / Cultured Cells / Tissue DNA
2. RNA Extraction: Blood / Tissue RNA
3. Clean Up: PCR / Gel Purification

**CAISSON**

Cell Culture Media  
Sera  
Antibiotics & Antimycotics  
Balanced Salt Solutions  
Buffers, Supplements, & Other Reagents

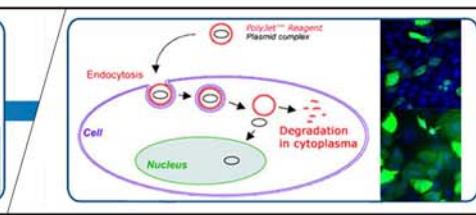

**Lab Companion**

Incubators  
Oven  
Refrigerators & Freezers  
Clean Benches  
Fume Hoods  
PCR Workstations

**GYROZEN®**

Personal microcentrifuge  
Refrigerated, high speed microcentrifuge  
Multi-purpose, high speed centrifuge  
Multi-purpose, high speed, table-top centrifuge  
Refrigerated, floor type high speed centrifuge  
Refrigerated, large capacity, high speed centrifuge  
Refrigerated, large capacity centrifuge  
Low speed clinical centrifuge

**SignaGen® Laboratories**

Transfection Reagents

"Biodegradable Polymer (BDP) Technology for" DNA transfection

"pH Dependent Conformational Change (PDCC)" Technology for siRNA transfection

High Efficiency Very Low Cytotoxicity

**sartorius**

Laboratory Balances  
Lab Water Systems

Ultrafiltration

Filters

Syringe Filters:  
Minisart®  
syringe filters

Vacuum Filter Unit:  
Sartolab®

Mechanical Pipettes:  
Capp Bravo  
CappAero multichannel  
CappAero 384  
Pipette controllers:  
Capp Controller  
Repeaters:  
Capp Rhythm  
Capp R10

**RNA ISOLATION**

- RNAzol® RT
- TRI Reagent® BD
- RNAzol® BD
- TRI Reagent® LS
- TRI Reagent®
- TRI Reagent® RT

- Rapid and reliable way to remove repeated transcripts from cDNA library  
- Equalization of full-length-enriched cDNA before library cloning  
- Simple procedure, no physical separation steps  
- Fully compatible with Illumina / Solexa, ABI / SOLiD and Roche / 454 sequencing protocols

Trimmer-2 cDNA normalization kit

Legend: all seqs, unique, non-unique

**evrogen**

cDNA normalization
